

SCRAP IRON IS TREASURE

Canada's Expanding Steel Mills Are Crying For It

"Junk" used to be something that was thrown away, neglected or just left lying around cluttering space. But the scrap heaps are of increasing value because of their steel content. Advertisements are appearing in Canadian and U.S. newspapers and trade journals, urging the nation to do just one more scrap.

The object is to acquaint everyone, particularly those who work in industry and agriculture, with the fact that more scrap iron means more steel houses.

A plentiful supply is important to everyone. Steel for building and iron for machinery are essential to the use of steel, and even greater quantities of it are necessary to run modern way of life.

Scrap iron and steel is an important ingredient for the efficient economic production of steel and iron. Lead the melting steel in steel furnaces to scrap—and for higher

grades of steel, such as those made in electric furnaces direct one hundred per cent scrap is required. In Canada, melting of steel requires scrap. At one time, the reserves dropped to as low as three days and then the government had to make a special appeal to the public to contribute scrap metal to the emergency shipments from mill to mill.

Scrap stockpiles in both Canada and the United States are casting a long shadow in steel market quotations. The prospect, moreover, is for more and more scrap metal in the near future.

In Canada alone construction of iron and steel plants is estimated at \$122 million in 1959. Last year 18 million tons of steel were produced. In 1960, 24 million tons and in 1963 we will be in the neighborhood of 43 million tons.

Canada and the U.S. are not alone in this shortage or threatened shortage of scrap. It is world-wide, principally because production facilities and demand are expanding at such a rate and because much potential scrap has not been recovered during the war.

Canadian steelmen say they are not facing immediate shortages as some might expect. They are not alone in the United States. One of the better reasons are "pencil points" right now. For an example...

ended seeing the steel mills have been operating in a "flooded" condition of just six days reserve supplies of scrap. At one time, the reserves dropped to as low as three days and then the government had to make a special appeal to the public to contribute scrap metal to the emergency shipments from mill to mill.

Man's Age In America Placed At 12,000 Years

TEPEPAK, Mexico. — Archeologists are mopping out new evidence in a prehistoric human graveyard in search of more evidence that the "first Americans" came to this continent 12,000 years ago. They hoped to find weapons or actual remains of primitive hunters who fought tigers in the valley of Mexico.

First proof that man existed in the region, Hemphill at the same time as the prehistoric, was discovered here when two first excavations of the site were made. The first was a mammoth that lived about 12,000 years ago.

Marie Louise Worthington, author of *Excavations at Tepic*, said there was no doubt that the mammoth was killed by ancient hunters.

This is the most important discovery of its kind ever made in the Americas," she said. "It finally demonstrates the theory that the 'first Americans' could not have existed side-by-side with the mammoth, the giant tiger and other prehistoric animals."

The mammoth bones were found by workers digging an irrigation ditch in the village 30 miles north of Mexico City, less than ten miles from the spot where a skeleton of a human being was found in 1936.

The knife and spear found with the mammoth teeth are not evidence of the same period as the "first Americans," she said. "They are later and the mammoth teeth are from the same period as the 'first Americans'."

Dr. Luis Alvarez, who headed the excavation, said the discovery appeared to be "an instrument made by the first Americans."

Every time the factory for its own growth besides being a factory where timber for houses and furniture, wood pulp for newspaper, and a long list of chemical hydrocarbons are made in the first stages of production.

In fact, the modern factory is a waterworks division as in the rest system. Uncounted millions of minutes of water, wood pulp, paper, and other materials are gathered together and sent to the waterworks division for processing. The water is then sent to the waterworks division for processing.

Vicar Warns Couples Of Marriage Hazards

ENFIELD, Middlesex, England. — Twenty-five couples married in the vicar's church, were told by the vicar, Rev. J. B. Hargrave, that some people should never consider marriage.

"Given as many as 10 chances they will be married," he said. "I have seen many couples who have been married for 10 years and are still not happy."

He advised the young couple to get married in the vicar's church. He said that some people should never consider marriage.

Simplifying Your Sewing For Summer

Most smart women who like to see their own clothes start working in the summer months. They are right now, so they will be ready to relax in the pleasant warm weather.

With your spring sewing in mind, here are some of the new labor-saving devices your local sewing store has available for the ambitious home seamstress.

If your sewing box has a delightful causal air with spoils of thread, it may be time to get a new one. It may be time to get a new one.

There is a little new machine in the sewing box that will do it all. It is a new machine that will do it all.

So that your belts will have a professional finish, there is a new addition to which you simply attach your dress material. It will wash and dry like the rest of the dress.

So that the home seamstress can do as high-fashion as the designer, there is a new machine that will do it all.

There is a new machine that will do it all. It is a new machine that will do it all.

There is a new machine that will do it all. It is a new machine that will do it all.

There is a new machine that will do it all. It is a new machine that will do it all.

California Boy
Receives Help In
Canadian Hospital

WORLD NEWS IN PICTURES

Prince Bernhard
Could Not Escape
Photographers

CANADIAN'S SKILL SAVES CRIPPLED BOY—Little Marty Kornblum was told he wouldn't be able to walk after an attack of poliomyelitis. But his parents, in California, read about Canada's Hospital for Sick Children and of Dr. William Mustard and his work on atrophied muscles. So they set up residence in Toronto, Marty underwent several operations by Dr. Mustard, and here he is adding a football to the arsenal of his sister.—Central Press Canadian.

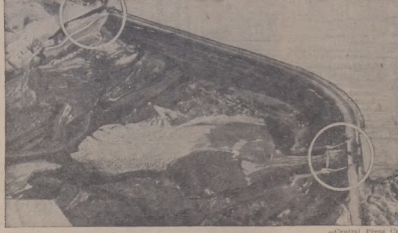

GETS FULL YONNORIAL TREATMENT—While Queen Juliana became reacquainted with Ottawa, her husband, Prince Bernhard was travelling through the U.S. But even while having a harrold he could not escape photographers. Here, in San Francisco, he gets the full Yonnorial treatment.—Central Press Canadian.

REBELS U.S. TO JOIN IN REAL CONSTRUCTION—Speckman, for the advocacy of U.S. participation in the construction of the St. Lawrence seaway, H. E. Danforth believes that Congress will vote in his favor. Speaking in Toronto, he said the Canadian viewpoint had not been well explained in Washington, and that the Canadian decision to build the seaway alone has been taken as a bluff. When the U.S. thoroughly understands Canada is not bluffing, Mr. Danforth believes it will become a partner in the project.

HANDLES THE SITUATION—This is how Patrolman Albert Krogstad handled the situation when he was called to a movie theatre in St. Paul, Minn., where three-year-old Jackie Janisch was choking on a piece of candy a chain had given him. The operation was successful.

WALL OF WATER THREATENED SASKATCHEWAN TOWN—A state of emergency existed in Swift Current, Sask., when recently threatened by a wall of water at present held back by the Damskirt dam, shown here, 30 miles away and 500 feet higher. The spillways, closed, were in danger of giving way, letting loose a reservoir of water 16 miles long, 20 feet deep and three-quarters of a mile wide.

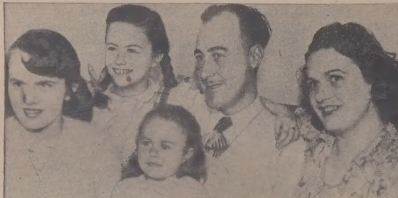

THE SEASON OPENS AT PANMUNJONG—This North Korean farmer turned up at Panmunjom recently with a fishing rig that intrigued both United Nations and Red Chinese personnel in the area. His gear consists of a rod connected to a battery carried over the shoulder and a small net on a long pole. The pressure a bellows, shocks the fish and scoops them up in the net. Judging by the string held by a Korean at right results are plentiful if not hefty.

CADDY, a king-size sea lion

LENNY, just plain monster

VANCOUVER MONSTERS ARE BIGGEST, ONTARIO'S MOST UGLY—After years of nursing the legend of a monster inhabiting the waters of Vancouver Island, British Columbia, residents fear they have caught the goose that laid golden tourist eggs. Hunted sailors at Uclulet on the west coast of Vancouver Island was a giant elephant and whose normal appearance is enough to make anyone resolve to stick to split food and who may be, according to Dr. N. M. Carter, head of the Pacific Fisheries station, the "Caddy" of colloquialism of the Vancouver Island monster legend. Not to be confused, southern Ontario produces a grizzly monster of the area. There's no name for it yet, but it's 14 inches long, has purple ears, a blue tail, four legs and eight fingers. It was fished out of the Rouge river and named Lenny by fisherman Charles Burton of Toronto.—Central Press Canadian.

RISKED HIS LIFE TO SEE WIFE BEFORE OPERATION—After risking his life to be with his family, Norman McKelgan is given an affectionate reception at Waterville Village, 14 miles from Halifax, N.S. Windows operator on false island 50 miles off the east coast, McKelgan resigned his job and set out in a ship to row himself to the mainland to be with his wife before she submitted to a surgical operation. In 48 hours he averaged one mile an hour in spite of relatively good weather. He was finally picked up by a trawler and taken to Halifax.—Central Press Canadian.

U.S. POLICE HOLD BROWN LOOK SUSPECT—Alfred A. Gagnon, a used car salesman, is being held in Chicago for questioning in connection with the \$1,010,000 Brink's robbery—the biggest in history—in Boston two years ago. He is alleged to have helped in disposing of the stolen money.—Central Press Canadian.

JOHN VINSON clammers through a window of his home—one of the many in the flood-ravaged area of Council Bluffs, Ia.—who got ration for his pet dog, Raggy. The dog had to be left behind when the family evacuated and John worried so much about him starving that he got a police pass to visit the house. Grocery stores were closed so John did the next best thing—he "robbed" his own house to feed an approving Raggy.

FACE IS ONLY HUMOR IN FRONT LINE—Drinking into a bottle of 4.5° rockets leave very streaks in their wake as they head toward enemy positions in Korea. Hope for armistice have slowed activity on the battle line, but patrols and artillery units are kept busy.

MIGHT AS WELL BE IN THE NAVY—Flood waters of the Minnesota and Mississippi rivers are receding now after the highest crest in history and after a million persons had been displaced. The high water brought misery, but had thousands of people working together to save their lives and their possessions. One of the hundreds sent to the flood in this one of two U.S. air force guards—aside the St. Paul, Minn., air force base—making their rounds by boat.—Central Press Canadian.

FINES STREILING SHEILA—The 18-year-old girl, Sheila, was fined \$100 for her recent expedition to Yaman. The explorer, charged by the Yonnorial government with stealing a golden statue of the Queen of Sheba, denied that his party ever found such a statue among the unexcavated ruins.

Properly Cared For Manure Is Most Valuable Fertilizer

Animal manure is by far the most valuable fertilizer on the dairy farm. It not only supplies plant nutrients, but also adds great amounts of living bacteria—most of which are beneficial—to the soil. In addition, manure is an organic and provides food for a heavy population of soil bacteria and other organisms which help to bring our manure soils in a good physical condition. Most manure is also a good source of important minor elements, such as boron, magnesium, copper and zinc.

The actual quality or analysis of manure depends upon a great extent on the kind of food consumed by the farm animals. On dairy farms, the fertilizer contained in the grain and feed usually exceeds that of the fertilizer bag. Thus, grain has about four to five times as much available nitrogen as the phosphorus in the same amount of manure.

For easy feeding, a ton of fresh dairy manure contains about 100 pounds of 16-8-0 fertilizer. Of course, these figures vary greatly depending on feed used, but they roughly represent dairy manure at the time it is produced. However, many of these nutrients may be lost between the time the manure is produced and the time it is used.

70,000 Children Benefit From Foster Parents' Plan

There is a little eight-year-old girl in Greece called Vasiliki, whose civil life story was shot by the German Nazis before her birth, who was taken to a school in Canada. There, she was raised in a three-room house with a mother and six other children. Her foster mother, who is going to school for a degree in education, says that her foster mother is not better than she is taking milk.

Vasiliki is only one of the little girls in Greece, France, Belgium, Italy, Holland and England, which have been born in various countries, who are the children of Canadians from coast to coast through the Foster Parents' Plan for War Children. A non-profit, non-sectarian organization of two Englishmen in 1942 to bring relief to children orphaned by the Spanish Civil War. Her foster parent is one of over 200 Canadian women who are the Foster Parents' Plan. These women, who contribute to the plan, there are approximately 6,000 in the world today, and as a result of their generosity, 70,000 children, who in their short lives have known nothing but poverty and neglect are being given encouragement, and a new sense of belonging to mankind.

When the plan was conceived, destitute children in Spain were placed, for shelter in abandoned houses in Catalonia. When war drew near, they were removed to France. The Great War followed, and the children were taken to England with additional help obtained from the United States. A system was then evolved which remains in effect today, a plan headquarters in London from which the plan's work in all countries is directed, with the home and financial headquarters in New York.

There is now no attempt made to remove children from their homes. "Adoption" is financial, not legal. There is no mass relief. The relationship is on a personal basis. A mother agrees to contribute \$15 monthly toward food and medical care, receives a photograph of the foster child and enters into correspondence with the child.

Canada may obtain information regarding the operation of the plan which has been called the first application of the Christian principle, by writing to Miss Gail Matthews, Canadian Director, Foster Parents' Plan for War Children, P.O. Box 216, Montreal.

Canadian Fashions

John T. Hines, Grand Rapids, Mich., put an advertisement in the paper for a housekeeper and hired Mrs. Della Hines. A week later he was advertising again, this time for a maid. Mrs. Hines received five days then married her boss.

Pain Food Output Showed Increase During Last Year

OTTAWA—Canadian food production from farm to farm has increased by 10 per cent in the last year.

They produced less chewing gum, candy, confectionery, soft drinks, ice cream, margarine, jam, jelly, fruit and other food products than in 1939 or 1941.

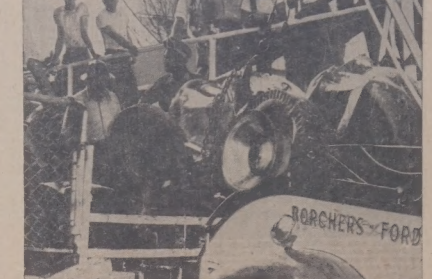

They produced less fruit, fruit juice, soft drinks, fruit and vegetables, relishes, breads, cereals, poultry, shellfish, meat, fish, and other food products than in 1939 or 1941.

It was up in treated coffee, food products, and other food products than in 1939 or 1941.
